

A lifetime of support and information  
for families and carers of people with

**Down's  
Syndrome  
and  
heart  
problems**

0300 102 1644

On average 2 babies are born daily in the UK with Down's Syndrome

47% will have congenital heart defects

**So every day a baby is born with these combined problems**

Down's Heart Group provides support for their families and carers at every stage, from pre-natal diagnosis through surgery, into adulthood and after loss.

We provide parent friendly information to enable parents to make informed choices as their child grows and help them through any worries and problems they face.

Our telephone and email helpline provides easy contact with our information team who as well as lending a sympathetic ear, can signpost families to other sources of assistance if needed.

**Could we help you or someone you know?**
